SKILLS SUMMARY

Developer with hands-on Linux and container-platform experience, building and teaching cloud-native infrastructure — Kubernetes networking and load balancing, Docker, and cloud deployment on GCP and DigitalOcean.

EDUCATION

• **Software Development Training**
Korea Software HRD Center, Phnom Penh
2024 — 2025

• **B.S. Information Technology**
Royal University of Phnom Penh
2020 — 2024

• **High School Diploma**
10 January 1979 High School, Siem Reap
2019 — 2020

LANGUAGES

Khmer Native
English Professional
Korean TOPIK I, Level 2

SOFT SKILLS

💡 Problem-solving 🧑‍🏫 Mentoring
🗨 Communication 📖 Self-learner
🔄 Adaptability ⌚ Time management

CLOUD & INFRASTRUCTURE ENGINEER · DEVOPS · FULL STACK DEVELOPER

Developer with a growing infrastructure focus — Linux systems, containerization, and Kubernetes networking/load balancing — gained through personal cloud projects and teaching.

WORK EXPERIENCE

- **Instructor** 2025 — Present
Korea Software HRD Center · Phnom Penh
 - Teach software development and IT fundamentals, including Linux administration and container basics.
 - Guide students through setting up a Kubernetes cluster load balancer, covering networking and traffic routing.
- **Software Developer** 2023 — Present
Personal Projects
 - Built Assessify, PipeJet, and ZenTrio — full-stack platforms for evaluation, deployment, and task management.
 - Containerized apps with Docker/Kubernetes on Ubuntu-based cloud environments with NGINX/Istio load balancing, and set up CI/CD pipelines (Jenkins, ArgoCD) with Grafana monitoring for automated deployment and uptime visibility.
- **Computer Teacher** Aug 15, 2022 — Mar 15, 2024
First job — taught computer literacy and basic programming; trained new staff members to become teachers.

TECHNICAL SKILLS

- **Cloud & Infrastructure**
Google Cloud Platform (GCP), DigitalOcean, NGINX, Istio, Cert-Manager
- **Containers & Orchestration**
Docker, Kubernetes, Load Balancing, Service Networking
- **Operating Systems**
Ubuntu, CentOS, Linux administration
- **CI/CD & Monitoring**
Jenkins, ArgoCD, Ansible, Grafana
- **Development**
React, Next.js, Tailwind CSS, Java, SpringBoot, Python, C#
- **Design & AI Tools**
Figma, UX/UI Design, Claude Code, ChatGPT

PROJECTS

- **ZenTrio** (Top 1 of 8)
Task management system for team collaboration and productivity — Figma, UX design.
- **EduTrace** (Top 1 of 6)
Connected learning platform for KSHRD — task tracking, meeting rooms, assessments, and AI-powered progress reports.
- **Assessify** (Top 2 of 8)
Employee evaluation system streamlining performance assessments — Figma, UX research, prototyping.
- **PipeJet** (Top 3 of 6)
Automated deployment platform focused on developer workflow — Figma, user journey mapping.

CLOUD & INFRASTRUCTURE FOCUS

- 1 **Linux systems** — Ubuntu and CentOS, from coursework through daily DevOps work.
- 2 **Kubernetes networking** — cluster load balancing and traffic routing, taught hands-on.
- 3 **Cloud deployment** — GCP and DigitalOcean, containerized services with Docker.
- 4 **Automation & monitoring** — CI/CD pipelines and Grafana dashboards for deployed services.

AI-ASSISTED DEVELOPMENT WORKFLOW

🔗 github.com/14th-Basic-Instructor-AI-Training/full-stack-destination

- 1 **Project conventions** — a CLAUDE.md defining architecture and code style.
- 2 **Reusable skills** — packaged instructions for recurring tasks.
- 3 **Subagents** — focused agents that keep context clean.
- 4 **Quality hooks** — automated lint/test gates before merge.
